EMPLOYMENT

Software Engineer	Amazon	Aug 2022 - Present
--------------------------	---------------	---------------------------

California, United States

- Designed and implemented a data annotation/comparison framework (AWS DynamoDB, SQS, AppConfig, Lambda) enabling safe dual-service migration, improving scalability for a system handling 100B monthly traffic.
- Diagnosed and resolved a JVM memory leak in Amazon's refund system (EC2, ECS, Java, DocumentDB), reducing failed refunds by 2% and improving service stability.

Senior Software Engineer	PayPal	Jun 2018 - Jul 2022
---------------------------------	---------------	----------------------------

California, United States

- Reduced merchant onboarding time 3x by rebuilding the Unified Onboarding service (NodeJS, Spring, Redis). Achieving a 60% reduction in page request latency and cross device compatibilities.
- Built Payouts product (Java, Spring, Akka, OracleDB), enabling 13K+ merchants to perform asynchronous mass payments across PayPal & Venmo.
- Increased consumer signups 1.3% yearly by developing incentive features in 'Login with PayPal' unified login product (NodeJS, ReactJS).

Software Engineer	NimbleRx	Jul 2017 - Apr 2018
--------------------------	-----------------	----------------------------

California, United States

- Developed consumer-facing API services(Python 2.7), driving 12% DAU growth.
- Streamlined new-patient onboarding via single-page app (Spring, AngularJS).
- Implemented prescription status newsfeed (NodeJS, ReactJS) improving patient visibility.

Software Engineer	GoFundMe	Oct 2015 - May 2017
--------------------------	-----------------	----------------------------

California, United States

- Increased monthly Gross Donation Volume 1.5% (US\$1.8M) by launching various product features via A/B testing (PlanOut).

Software Engineer	Eversnap	Jun 2013 - Aug 2015
--------------------------	-----------------	----------------------------

California, United States

- Developed web APIs (Python/Django), increasing DAU 23%.

EDUCATION

Singapore	National University of Singapore	Aug 2008 - Apr 2013
------------------	---	----------------------------

- Bachelor of Computing(B.Comp) in Computer Engineering
- Specialization: Embedded Systems
- Awarded *Best Project Award* (Wireless Computing Systems)

Languages and Technologies

-
- Languages: Java, JavaScript, Python
 - Frameworks: Spring, NodeJS, ReactJS, Django
 - Databases: RDBMS, DynamoDB, Redis, OracleDB
 - Tools/Platforms: AWS(EC2, ECS, Lambda, SQS, SNS, S3, DynamoDB), UNIX, Git
